The foreign trade deficit in the first seven months of 1958 reached IL-90.8m. Exports dropped from IL-219.9m in June to IL-180.1m in July, according to figures published yesterday by the Central Bureau of Statistics and Economic Research.

In July, imports dropped to IL-132m, as compared to IL-135m in June.

In the first seven months, imports stood at IL-775m, while exports amounted to only IL-715m. The resulting deficit, IL-66m, more (20.8 per cent) than the deficit in the comparative period of 1957.

Non-payment imports in the January-July 1958 period amounted to IL-145m, or IL-1.1m, more than in the same period last year. A breakdown of non-payment imports shows that the proportion of gifts and capital transfers rose, while that of capital and personal property brought by new immigrants dropped.

HIGHER PRICES CALCULATED

The calculation of price increases on imported commodities has been completed, it was learned in Jerusalem yesterday.

The Ministry of Agriculture and the Ministry of Commerce have approved the new price to be paid farmers for eggs and milk. This increase will not offset the retail price. Farmers will get 13 pruta more on each litre of milk and five pruta more for each egg. Monthly production comes to about 7.4 million litres of milk and about 20 million eggs. The increase to the producer will be covered by the price equalization fund, it was said.

It is estimated that more than IL-12m. will be realized out of the higher prices.

Iraqi Students Shout For New Government

Thousands of Iraqi university students and school children marched through the main streets of Baghdad yesterday, in spite of police opposition, shouting "Down with the Government."

They have announced a strike in protest against the failure of the Ministry of Education to cancel the Anglo-Iraqi treaty, AMA reports.

The strike, coupled with the threat by the four opposition parties to declare a general strike, has increased the uneasiness felt by the Regent, Abdul Ilah. Observers in Baghdad are daily expecting a coup similar to that in Beirut which deposed the President.

Rector Asks Students To Call Off Strike

Appealing to the students to call off their strike, Professor R. Rector, Rector of the Hebrew University, stated at a press conference in Jerusalem yesterday that one of the main causes of the present impasse in the lack of a representative student organization.

New and different student committees with varying composition, constantly being elected, "cheap democracy" and ignorance of the subjects under discussion mark student organizations.

The University has never deviated from, nor opposed in any fashion, the discussions reached by the student committees which investigated the effective representation of students.

The Rector said that the IL-100 tuition fee was in complete harmony with Government recommendations.

"I regret to say that I don't know what the strike is about," he declared. Last year's tuition of IL-100 had been paid six years ago. A Government committee which examined the budgets of public institutions last year, had recommended a fee of over IL-100.

A similar suggestion was made by the Knesset committee which proposed IL-100 toward tuition and IL-50 for a scholarship fund. The University was also to help provide housing and student restaurants. The students were notified of the proposed increase a year ago but for lack of effective representation, the increase did not get into effect until shortly before the new term.

The Rector said that IL-100 worth of material had been brought to Jerusalem to set up another restaurant. Various scholarships exist, some of which pay the tuition of students who are poor. The Rector said that the IL-100 fee was not a new fee, but a fee which had been paid for many years.

At the opening of the present conference, Dr. Rector outlined the situation of the University.
